Jira

02. EXPERIENCE

August 2020 – present

Inmarsat
Junior Analyst Developer

Responsible for application integration development, under the guidance of senior developers, to deliver integration services and other utility tools that would benefit integration development.

Developing code for microservices, unit testing, maintaining and supporting continuous integration. Familiarity working with OpenShift Platform to develop and test services.

January 2020 – May 2020

Inmarsat
Integrations Work Term Student

Created an in-house user interface for a micro service to be deployed to Inmarsat employees. The user interface was created using HTML, CSS, Bootstrap and JavaScript/jQuery connected to a REST API.

Also gained knowledge and worked with Jira, OpenShift, IntelliJ IDE, Amazon Workspaces, Git and GitHub version control. Participated in Agile software development practices, worked closely with the integration team members and working in a micro-service environment.

May 2020 – August 2020

Husky Energy
Service Desk Work Term Student

Responsible for receiving intake of demand from diverse client base, registering tickets in management system and managing the ticket life cycle. Also assisted with facilities moves, deploying new PC's and upgrading and installing software.

June 2017 – April 2018

Chimo Construction
Project Coordinator

Assisted with completion of design/build and multidisciplinary tender packages and operations manuals. This included quantity takeoffs, estimates, schedules as well as correspondence with various suppliers, contractors, subcontractors and clients.
